

# Knowledge Mat: Seasonal Changes

## How does this link to GROW?

G: respect and care for God's creation

## Subject Specific Vocabulary:

spring	The season when flowers start to blossom and lambs are born.
summer	The hottest season with the longest days.
autumn	The season when tree leaves start to change colour and fall off.
winter	The coldest season with the shortest days.

## Key knowledge:

### In autumn:

- leaves change colour and fall off the trees
- colder weather
- animals hibernate

### In winter:

- the weather is cold
- the days are shorter and it can be dark in the morning and evening
- we experience ice, frost, rain, snow and sleet

### In spring:

- the temperature begins to get warmer and we experience more sunlight
- plants and animals that hibernate wake up again
- lots of animals have their babies in the spring

### In summer:

- the outside temperature is warmer and we see lots more sunshine
- sometimes there can be a heatwave
- we need sun cream in the summer

## Books you might like:

## What I've learnt previously:

There are four seasons: spring, summer, autumn and winter.

## This will help me to:

Identify different types of weather and which seasons they commonly occur in.
